Reviews

An extremely wonderful pdf with lucid and perfect explanations. I could possibly comprehend every little thing out of this created e pdf. Once you begin to read the book, it is extremely difficult to leave it before concluding.

CHILDREN AND PENSIONS (HARDBACK)

MIT Press Ltd, United States, 2007. Hardback. Book Condition: New. 232 x 160 mm. Language: English . Brand New Book. The rapidly aging populations of many developed countries--most notably Japan and member countries of the European Union--present obvious problems for the public pension plans of these countries. Not only will there be disproportionately fewer workers making pension contributions than there are retirees drawing pension benefits, but the youth-to-age imbalance would significantly affect the total contributive capacity of future generations and hence their total income growth. In *Children and Pensions*, Alessandro Cigno and Martin Werding examine the way pension policy and child-related benefits affect fertility behavior and productivity growth. They present theoretical arguments to the effect that public pension coverage as such will reduce aggregate fertility and may raise aggregate household savings. They argue further that public pensions, as they are currently designed, discourage parents from private human capital investment in their children to improve the children's future earning capacity. After an overview of pension and child benefit policies (focusing on the European Union, Japan, and the United States), the authors offer an empirical and theoretical analysis and a simulation of the effects of the policies under discussion. Their policy proposals to address declines in fertility and productivity growth include the innovative suggestion that relates a person's pension entitlements to his or her number of children and the children's earning ability--proposing that, in effect, a person's pension could be financed in part or in full by the pensioner's own children. Alessandro Cigno is Professor of Economics at the University of Florence and coauthor of *The Economics of Child Labor*. Martin Werding is Head of the Department of Social Policy and Labor Markets at the Ifo Institute for Economic Research and the editor of *Structural Unemployment in...*
