Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from The New Physiology in Surgical and General Practice The last edition was published just before the war. Needless to say we have learned a great deal in the past live years. Research in pure physiology and its applications to the clinical sciences has fallen principally into the hands of the Americans, whilst the British investigators have devoted themselves especially to problems arising out of the material presented by the wounded in the war. The results of study, observation, and experiment along both these lines are here gathered together. Much of the book is new, but the objects and scope remain as in the preface to the original edition. To make way for additional material considerable sections have been deleted altogether. The chapters on food deficiency diseases, the blood and spleen, surgical shock, the spinal cord, and the functions of the cortex, have been re-written almost in their entirety. A new chapter on the heart has been contributed by my colleagues Dr. Carey Coombs and Dr. C. E. K. Herapath, to whom I am greatly indebted for this service. There are considerable additions to the chapter on digestion, and less important changes in nearly all the other parts of the book. Very little is left of the first edition, published in 1911. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may...
