DYNAMO TENDERS HAND-BOOK (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Dynamo Tenders Hand-Book Each company manufacturing electric light apparatus furnishes special directions for its care and management, and hence a general knowledge of the principles governing the construction and operation of electric light installations has been obtainable only by a practical observation of the features of each system or by study of books so technical in character as to be beyond the comprehension of those not possessing an academical or collegiate education. Therefore, in the preparation of Dynamo Tenders Hand-Book, the author has striven to lay down, as the results of an extended experience, general rules for the care and operation of electric light installations and discarding entirely the use of technical phraseology and scientific terms and formulae, has endeavored to confine his use of words to those very plain, simple and elementary in character. To dynamo tenders, engineers, linemen and others who wish to familiarize themselves with the principles underlying the care and operation of electric light installations, this hand-book is offered with the hope that the author's intentions have been carried out to the full. To those who wish to pursue the study of the principles of electric lighting into deeper channels, the author cordially recommends Elementary Lessons in Electricity and Magnetism, by Silvanus P. Thompson; Electric Light Arithmetic, by R. E. Day; Magneto Electric and Dynamo Electric Machines, by Dr. H. Schellen; Munro Jamieson's Pocket-Book of Electrical Rules and Tables. The great demand for the Dynamo Tenders Hand-Book has compelled the author to prepare a second edition. He has corrected several errors of the first edition, and added the new Rules and Regulations for Overhead Conductors for Electric Light and...
