Regnery Publishing Inc, United States, 2006. Paperback. Book Condition: New. 229 x 183 mm. Language: English . Brand New Book. Why Darwinism--like Marxism and Freudianism before it--is headed for extinction In the 1925 Scopes trial, the American Civil Liberties Union sued to allow the teaching of Darwin s theory of evolution in public schools. Seventy-five years later, in Kitzmiller v. Dover, the ACLU sued to prevent the teaching of an alternative to Darwin s theory known as Intelligent Design --and won. Why did the ACLU turn from defending the free-speech rights of Darwinists to silencing their opponents? Jonathan Wells reveals that, for today s Darwinists, there may be no other choice: unable to fend off growing challenges from scientists, or to compete with rival theories better adapted to the latest evidence, Darwinism--like Marxism and Freudianism before it--is simply unfit to survive. Wells begins by explaining the basic tenets of Darwinism, and the evidence both for and against it. He reveals, for instance, that the fossil record, which according to Darwin should be teeming with transitional fossils showing the development of one species to the next, so far hasn t produced a single incontestable example. On the other hand, certain well-documented aspects of the fossil record--such as the Cambrian explosion, in which innumerable new species suddenly appeared fully formed--directly contradict Darwin s theory. Wells also shows how most of the other evidence for evolution-- including textbook icons such as peppered moths, Darwin s finches, Haeckel s embryos, and the Tree of Life--has been exaggerated, distorted .and even faked. Wells then turns to the theory of intelligent design (ID), the idea that some features of the natural world, such as the internal machinery of cells, are too irreducibly complex to have resulted from unguided natural processes alone. In clear-cut layman s language,...
