0.2in. Aryabhata (sometimes spelled as Aryabhata) was one of

the greatest mathematician and astronomer of the classical

world. He not only had enormous influence in India but across

the world. He was only 23 years old when he wrote the

Aryabhatiya. It consisted of this findings including

astronomical constants and the sine table, mathematics, the

reckoning of time (movement of heavenly bodies) and about

the cosmos. He was the one to calculate the value of Pi,

observed solar and lunar eclipses, calculated the summation of

series of squares and cubes, determined the area of a triangle,

defined cosine, versine and inverse sine. He is credited for

finding how long it took the earth to spin on its axis, the length

of the year and coming up with the heliocentric model and

much more. Unfortunately, many of us do not even know who

Aryabhata is. Sadly, not much is even known about his life,

where he came from, about his parentage or even his name

for that matter. This book discovers and evaluates the life and

works of the worlds...
